Weather Bulletin

Issued at: 6am

Monday 10th December, 2018

Present Weather: Cloudy

Winds: A moderate breeze of 15mph from the east

Temperature: 26°C / 78°F

Humidity: 71%

Sea Level Pressure: 1018.3mbs or 30.07"

Sunrise: Tom 6:30 am

Sunset: Today 5:38 pm

Weather Forecast Valid until 8am Tomorrow

Winds: East-southeast ranging between 12 to 18mph with higher gusts over open waters.

Seas: 1.5 to 2.1m or 5 to 7ft. An advisory for small craft operators is now in effect, especially for those operating on the eastern side of the Island.

Weather Forecast for St. Kitts & Nevis: Partly sunny with a 40 percent or a moderate chance of morning showers with a chance of showers reducing thereafter. Tonight will be partly cloudy with a 20 percent or a slight chance of showers.

Eastern Caribbean Forecast: The Atlantic high pressure system is the dominant weather feature. A relatively dry and stable air mass associated with this feature will inhibit any significant shower activity over the next 24 hours. Notwithstanding, low level moisture moving with the trade winds could give rise to brief shower interruptions resulting in, at most, a moderate chance of showers.
