**Weather Bulletin**

**Issued at:** 7 am

Friday 28<sup>th</sup> December, 2018

**Present Weather:** Cloudy with showers in the vicinity

**Winds:** Fresh Breeze of 20 mph from the NE

**Temperature:** 25°C/77°F      **Humidity:** 82%

**Sea Level Pressure:** 1018.7mb or 30.08"

**Sunrise:** Tom 6:39 am

**Sunset:** Today 5:46 pm

**Weather Forecast Valid until 8am Tomorrow**

**Winds:** Easterly at 17 to 28mph with gusts peaking to near 35mph at times.

**Seas:** 2.1 to 2.8 metres or 7 to 9 feet. **Small craft operators should stay in port as sea conditions have become dangerous to small craft operation and hence a warning is in effect.**

**Weather Forecast for St. Kitts & Nevis:** A fairly steep pressure gradient will produce moderate to strong winds across the region which will make sea conditions dangerous for small craft operation. Some moisture and instability associated with a trough along with additional moisture streaming into the region on the windflow will also maintain a high chance of showers across the islands. Possible rainfall total for the forecast period is 6mm to 19 mm or 0.25 to 0.75 inch.

Weather Today: Cloudy with an 80 percent or very high chance of showers.

Weather Tonight: Cloudy with an 80 percent or very high chance of showers.

**Eastern Caribbean Forecast:** A broad area of high pressure accompanied by a steep pressure gradient will produce fresh to strong winds across the entire Eastern Caribbean. Some low level cloud patches being pushed across the region from time to time will also heighten the chance of some quick passing showers across the islands. Deeper moisture and instability moving into the Northern Caribbean from a trough will increase the chance of some moderate to heavy downpours over Puerto Rico east to the Leeward Islands.
