Weather Bulletin

Issued at: 7am

Monday 3rd December, 2018

Present Weather: Partly cloudy skies with showers in the vicinity

Winds: Moderate breeze at 15mph from the NE

Temperature: 26°C / 78°F

Humidity: 78%

Sea Level Pressure: 1016.8mbs or 30.02"

Sunrise: Tom 6:26 am

Sunset: Today 5:36 pm

Weather Forecast Valid until 8am Tomorrow

Winds: East-northeast at 12 to 18mph with higher gusts over coastal waters.

Seas: A combination of swells and wind driven waves with significant wave heights reaching 1.8 to 2.4 metres or 6 to 8 feet. A small craft advisory remains in effect, while sea bathers should continue to exercise caution, particularly along the northern and eastern coastal areas.

Weather Forecast for St. Kitts & Nevis:

Weather today: Partly sunny to partly cloudy with a 40 percent or moderate chance of brief and light passing showers.

Weather tonight: Partly cloudy with a 40 percent or moderate chance of showers.

Eastern Caribbean Forecast: A dominant Atlantic high pressure system continues to be the main weather feature affecting conditions across the Eastern Caribbean for the next 24 hours. The resulting tightened pressure gradient will maintain a moderate to fresh wind flow that will contribute to the elevated sea conditions along the northern and eastern coastal areas. Therefore, partly sunny conditions will be disrupted by intervals of cloudy periods and at most a moderate chance of showers today across Puerto Rico southward to Trinidad and Tobago. Partly cloudy conditions with a moderate chance of showers are expected tonight across the area.
