**Winds:** East-southeast at 9 - 18mph.

**Seas:** 1.2 - 1.8m or 4 - 6ft.

**Weather Forecast for St. Kitts & Nevis:** Mostly cloudy with a 40 percent or moderate chance of a brief passing shower

**Weather tonight:** Cloudy with a 60 percent or moderate chance light overnight rain with the chance of precipitation significantly increasing after day-break tomorrow.

**Eastern Caribbean Forecast:** The flow associated with a developing mid to upper trough over the western Caribbean will continue push upper moisture over the islands for the next 24 hours which will result in an abundance of medium and high clouds over the area. As this trough moves eastwards, it will combine with another developing low level trough to generate cloudy skies with localize showers over Puerto Rico today. By tonight and into tomorrow, showers activity will increase over the BVI's, Leewards and northern windward to a lesser extent. Islands further south will see partly cloudy to cloudy skies with brief passing showers.
