**Weather Bulletin**

**Issued at:** 7 am

Monday 9<sup>th</sup> September, 2019

**Present Weather:** Cloudy

**Winds:** Calm

**Temperature:** 27°C/81°F

**Humidity:** 88%

**Sea Level Pressure:** 1016.2mb or 30.01"

**Sunrise:** Tom 5:58 am

**Sunset:** Today 6:18 pm

**Weather Forecast Valid until 8am Tomorrow**

**Winds:** SE at 6 to 12 mph gradually becoming easterly with an increase in the wind speed by tomorrow.

**Seas:** Less than 1.2 meters or 4 feet.

**Weather Forecast for St. Kitts & Nevis:**

**Weather today:** Mostly sunny this morning. Partly sunny this afternoon with a 40 percent or moderate chance of brief localized afternoon showers.

**Weather tonight:** Fair to partly cloudy with a 20 percent or slight chance of an overnight shower.

**Eastern Caribbean Forecast:** An approaching tropical wave will generate cloudy spells with occasional showers over the southern Windwards and Trinidad and Tobago today and into tonight. Meanwhile, instability associated with a trough, coupled with daytime heating, will generate localized cloudiness and afternoon convective activity over Puerto Rico. The Leewards will see generally fair to partly cloudy skies; however daytime heating and light winds will generate brief localized cloudy periods and brief showers over some islands this afternoon.
