Weather Forecast for St. Kitts & Nevis: A relatively dry and stable airmass will continue to linger across the area overnight into early tomorrow and restrict shower activity during that time. By tomorrow afternoon a moderate trade wind flow could transport shallow low-level patches across the area and increase the chances for shower activity over and around the islands during that time.

Weather tonight: Fair to partly cloudy skies tonight with a 20 percent or slight chance of a brief shower.

Weather tomorrow: Partly sunny skies in general tomorrow with a 50 percent or moderate chance of afternoon showers developing.
