**Weather Bulletin**

**Issued at:** 6am

Monday 14<sup>th</sup> October, 2019

**Present Weather:** Fair

**Winds:** Calm

**Temperature:** 26°C / 78°F

**Humidity:** 85%

**Sea Level Pressure:** 1013.6mb or 29.93"

**Sunrise:** Tom 6:04 am

**Sunset:** Today 5:50 pm

**Weather Forecast Valid until 8am Tomorrow**

**Winds:** Easterly today then shifting to the East-southeast tonight at 4 to 9mph.

**Seas:** 1 to 1.2 metres or 3 to 4 feet.

**Possible rainfall total for the forecast period is 6 mm and 25 mm or 0.25 to 1 inch.**

**Weather Forecast for St. Kitts & Nevis:** Today will be partly cloudy to cloudy with an 80 percent or a very high chance of showers. There is also a 40 percent or a moderate chance of thunderstorms this afternoon. Tonight will be partly cloudy to cloudy with a 70 percent or a high chance of showers.

**Eastern Caribbean Forecast:** Moisture and instability associated with a trough and a tropical wave will keep the chances of showers high across the Windward Islands south to Trinidad and Tobago and Puerto Rico east to the Leeward Islands today and tonight. There is also a moderate chance of thunderstorms developing over the Islands today. A drier and more stable atmosphere settling over the Southern Caribbean tonight will maintain a low chance of showers under partly cloudy skies over the Windwards south to Trinidad.
