Weather Bulletin

Issued at: 6 am

Tuesday 1st October, 2019

Present Weather: Partly cloudy skies

Winds: Calm

Temperature: 26°C/79°F **Humidity:** 89%

Sea Level Pressure: 1011.3mbs or 29.86"

Sunrise: Tom 6:00 am

Sunset: Today 6:01 pm

Weather Forecast Valid until 8am Tomorrow

Winds: Southeast at 5 to 12mph becoming variable or calm overnight.

Seas: 1.2 to 1.8 metres or 4 to 6 feet with northeasterly swells of 1.8 metres or 6 feet. As a result, high surf advisory remains in effect.

Weather Forecast for St. Kitts & Nevis: A dry and stable airmass lacking in moisture will continue to restrict shower activity over and around the islands today and tonight. In addition, a light and warm south easterly wind flow will continue to produce uncomfortably warm conditions across the area today.

Weather today: Mostly sunny and warm.

Weather tonight: Mostly fair skies.

Eastern Caribbean Forecast: Across the Eastern Caribbean from the British Virgin Islands southwards to Trinidad & Tobago skies will be generally fair to partly cloudy with only a 10 percent or slight chance of a shower, as a dry and stable airmass associated with a high pressure ridge continues to sit across the area and restrict shower activity.
