**Weather Bulletin**

**Issued at:** 7am

Thursday 28<sup>th</sup> November 2019

**Present Weather:** Cloudy skies with adjacent showers

**Winds:** Variable at 3mph

**Temperature:** 24°C / 75°F

**Humidity:** 94%

**Sea Level Pressure:** 1014.5mbs or 29.96"

**Sunrise:** Tom 6:23 am

**Sunset:** Today 5:35 pm

**Weather Forecast Valid until 8am Tomorrow**

**Winds:** East-northeast at 5 to 12mph becoming lighter and variable or calm tonight.

**Seas:** 0.6 to 1.2 metres or 2 to 4 feet.

**Weather Forecast for St. Kitts & Nevis:** An atmosphere low on moisture will maintain a low chance of showers for the most across the region. The presence of a weak pressure gradient will also produce light to gentle winds across the area.

**Weather today:** Sunny to partly cloudy with a 30 percent or low chance of showers.

**Weather tonight:** Mostly fair with a 10 percent or slight chance of showers.

**Eastern Caribbean Forecast:** Some moisture associated with a weak trough along with daytime heating will maintain a moderate chance of showers today across Puerto Rico and the Virgin Islands. Drier and cooler air settling over the area tonight will restrict shower activity. Some moisture and instability associated with another trough over the extreme Southern Caribbean will produce some showers under cloudy skies across Trinidad and Tobago. Meanwhile the chances of showers will remain low for the most across the rest of the Eastern Caribbean from the Leeward Islands south to the Windwards and Barbados.
