Weather tonight: Partly cloudy with a 20 percent or slight chance of showers.

Eastern Caribbean Forecast: A broad central Atlantic high pressure system will be the dominant weather feature over the islands of the Eastern Caribbean today and tonight. Whereas no significant weather is anticipated, available low level moisture embedded within a moderate wind flow will generate light passing showers over the Leewards and islands further west. Because of lower moisture content over the southern islands, the chance of rainfall will be reduced over these islands.
