Weather Bulletin

Issued at: 7am

Sunday 28th June, 2020.

Present Weather: Fair skies with haze

Winds: A moderate breeze of 13mph from ENE

Temperature: 28°C / 83°F

Humidity: 80%

Sea Level Pressure: 1015.3mbs or 29.98"

Sunrise: Tom 5:40am

Sunset: Today 6:49pm

Weather Forecast Valid until 8am Tomorrow

Winds: East-northeast at 12 to 17 mph today with a gradual reduction into tomorrow.

Seas: 1.2 to 1.8 meters or 4 to 6 feet.

Weather Forecast for St. Kitts & Nevis: Weather today: Partly cloudy with a 20 percent or slight chance of showers this morning and a 40 percent or moderate chance of brief showers later this afternoon.

Weather tonight: Partly cloudy with a 50 percent or moderate chance of early morning showers

Eastern Caribbean Forecast: Pockets of low level moisture embedded within a moderate breeze and aided by a weak mid-level trough, will cause periods of increased cloudiness and brief passing showers over the central windward islands today. The rest of the islands from Barbados southwards to Trinidad and Tobago will see generally stable weather conditions with brief passing showers likely. Similar weather conditions are expected over the Leeward Islands and islands further west this morning; however, instability will begin to increase over these islands later this afternoon. This will contribute to heightened chance of showers mainly over the Virgin Islands and Puerto Rico this afternoon and over the Leeward Islands tonight and into early tomorrow due to a trough.
