Weather Forecast for St. Kitts & Nevis:

Weather today: Partly sunny with a 20 percent or a slight chance of showers.

Weather tonight: Partly cloudy with a 20 percent or a slight chance of showers.

Eastern Caribbean Forecast: Generally settled conditions will prevail over the area as a high pressure ridge replaces an active tropical wave moving out of the area. Lingering instability and moisture will see at most a low chance of showers for the Virgin Islands however, as it continues west towards Puerto Rico daytime heating interacting with the wave could trigger unsettled weather for this island.
